

# WIE @ LYIT 2013

Presents -

## Selected Topics in Enterprise Applications Development

19<sup>th</sup> June 2013, 1:30-4:00pm

@ Letterkenny Institute of Technology, Letterkenny, Co. Donegal

This is the first in a series of events to provide a forum for researchers and practitioners to discuss issues involved in the development of systems at enterprise scale. This one day symposium aims to bring together members of Software Development, Security and Quality Assurance communities to promote discussion and exchange of experiences regarding tools, methodologies, design, development and maintenance processes for the enhancement of enterprise scale applications.

A secondary and essential element to this event is to provide an opportunity for Women In Engineering to network. By providing an opportunity for women in engineering to network more women may be encouraged to progress in their field and to find support and advice from others. Registration for the event will begin at 1:30 with events kicking off at 2:00. The presentation and discussion session will run until 3:30 which will be followed by tea and biscuits. This is to allow the remainder of the day free before the ISSC conference the next morning. This event will be co-hosted with the 24<sup>th</sup> IET Irish Signals and Systems Conference (ISSC '13). The ISSC will be held from 20<sup>th</sup> -21<sup>st</sup> June 2013 in Letterkenny Institute of Technology [www.issc.ie/site/view/7/home/](http://www.issc.ie/site/view/7/home/). The event is kindly sponsored by Letterkenny Institute of Technology. Registration is preferred for catering purposes. To register simply email your intent to attend to [Ruth.Lennon@lyit.ie](mailto:Ruth.Lennon@lyit.ie).

Guest Speakers include:

- **Dr. David Dampier.** Topic: Security in large scale applications.  
Dave Dampier currently serves as Professor of Computer Science & Engineering at Mississippi State University and Director of both the Centre for Computer Security Research and the National Forensics Training Centre. Prior to joining MSU in 2000, Dr. Dampier spent 20 years active duty as an Army Ordnance and Acquisition Corps Officer. His research interests are in Digital Forensics, Computer Security, and Engineering Education
- **Ms. Sharon Greene.** Topic: Quality Assurance in the Enterprise.  
Sharon Greene has worked for Pramerica as a Test Automation Engineer for almost 10 years. Ms Greene completed her B.Sc. in Computing with Data Communications in Letterkenny Institute of Technology. Ms. Greene specialises in performance testing, SOAPUI Web Services Load testing and automation of tests.
- **Ms. Mary Tuite.** Topic: Experiences with Mainframe Application Analysis for the Banking Sector.  
Mary Tuite has worked as an IT Professional with the Banking Industry for 24 years. Prior to this Ms. Tuite completed her studies in University College Dublin. Ms. Tuite currently works analysing mainframe programs and implementing technical solutions.

Other guest speakers & presentations will be announced closer to the event date.
